Please add my name to the list of opponents to NAB petition 04-160. Here in Sierra Vista we have a station that broadcasts locally for 2 hours in the morning, that's it. Then it plays some canned generic stuff the rest of the day. It doesn't provide me with any traffic information at all. Nothing! The weather is recorded and plugged in at various intervals. Furthermore, I drive about 30 miles to get to work and about 10 miles away from the station I lose it and have no radio at all in the Bisbee area. That's why I choose XM, I can hear it anywhere I go around here and don't lose the signal.
